Step 1. Perform a verification request

Note the requestId property returned in the JSON response which is used in the 2nd REST request.

Request (curl)

```
$ curl -H "Authorization: Bearer $TOKEN" https://services-sandbox.sheerid.com/rest/0.5/verification \
    -X POST -d FIRST_NAME=Joe -d LAST_NAME=Tester -d BIRTH_DATE=1972-01-14 -d _affiliationTypes=ACTIVE_DUTY
```

Response (formatted JSON)

```
{
    "affiliations": [{
        "type": "ACTIVE_DUTY",
        "organizationId": 4078,
        "organizationName": "Navy Reserve",
        "updated": 1401380018327,
        "start": 1222791218327,
        "end": null,
        "attributes": []
    }],
    "inactiveAffiliations": [],
    "status": "COMPLETE",
    "result": true,
    "requestId": "53875cb2e4b01db148ffd40e",
    "errors": [],
    "timestamp": 1401380018327,
    "request": {
        "metadata": {},
        "organization": null,
        "timestamp": 1401380018257,
        "userId": "4f70bfcfe4b01f7e8bec652e",
        "personId": "53875b6ae4b01db148ffd3fb",
        "config": {
            "affiliationTypes": ["ACTIVE_DUTY"],
            "verificationTypes": ["AUTHORITATIVE", "ASSET_REVIEW"],
            "assetTypes": ["ID_CARD", "OTHER", "DATED_ID_CARD", "INSURANCE_CARD", "OFFICIAL_LETTER", "PAY_STUB"],
            "rewardIds": [],
            "consolationRewardIds": [],
            "metadata": null
        }
    },
    "metadata": {}
}
```

Step 2. Fetch the person data

The endpoint used to fetch this data is dependent upon the requestId of the original verification request/response. *NOTE:* Use of this endpoint requires the PERSON_DATA role and person data may only be returned if it has not yet been purged according to the account's data retention policy.

Request (curl)

```
$ curl -H "Authorization: Bearer $TOKEN" https://services-sandbox.sheerid.com/rest/0.5/verification/53875cb2e4b01db148ffd40e/person
```

Response (formatted JSON)

```
{
    "fields": {
        "FIRST_NAME": "Joe",
        "BIRTH_DATE": "1972-01-14",
        "LAST_NAME": "Tester"
    }
```

}
